EXPERIENCE

Thales • Senior Product Designer

Jan 2022 – Present | Remote

- Lead end-to-end design for enterprise SaaS and cybersecurity products, simplifying complex workflows into scalable experience.
- Partner with product, engineering, and global stakeholders to guide solutions from discovery through implementation.
- Turn user and business needs into flows and high-fidelity prototypes validated through research and usability testing.
- Build reusable design system components and use AI tools to accelerate exploration, rapid prototyping, and design iteration.

IBM • User Experience Designer

May 2021 – August 2021 | Waterloo Canada

Industry-Sponsored Capstone Project

- Conducted user research and analyzed emerging AI trends to identify opportunities for responsible AI experiences.
- Translated insights into personas, journey maps, wireframes, and a responsible AI concept with a multidisciplinary team.

China Energy Net • UX Designer

July 2019 – April 2021 | Remote

- Conducted user research and usability testing for a cross-border professional service platform to inform product decisions.
- Designed intuitive user flows, detailed wireframes, interactive prototypes, and polished high-fidelity mobile interfaces.

GES • Marketing Designer

April 2018 – Jan 2019 | Sunnyvale USA

- Redesigned the company's official website to improve overall clarity, usability, and brand consistency, and engagement.
- Created engaging digital and print assets supporting integrated marketing campaigns and brand communications.
